Introduction

AquaCheck Mobile Application allow users on the AquaCheckWEB system to view AquaCheck Soil Moisture Probe data. Soil moisture data is available in graphs.

Downloading and installing the APP

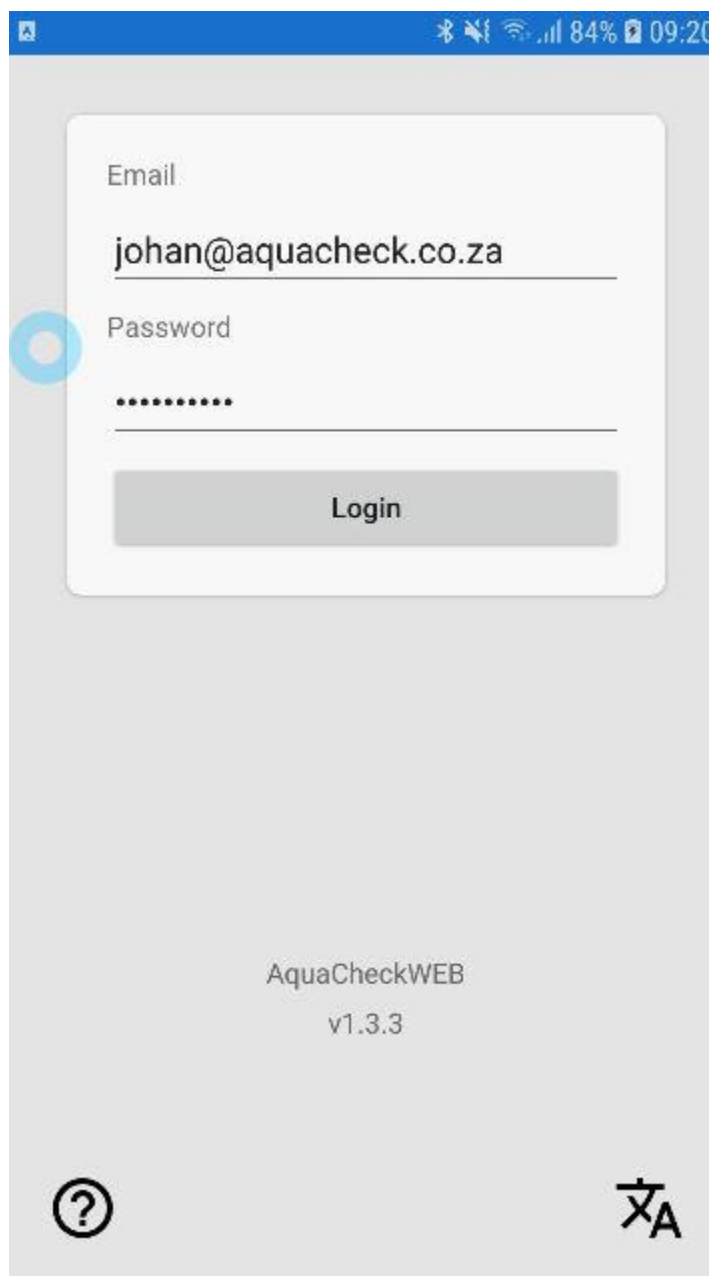

The APP can be found on Google Playstore (Android) or Apple iStore (Apple). Simply search for AquaCheck.

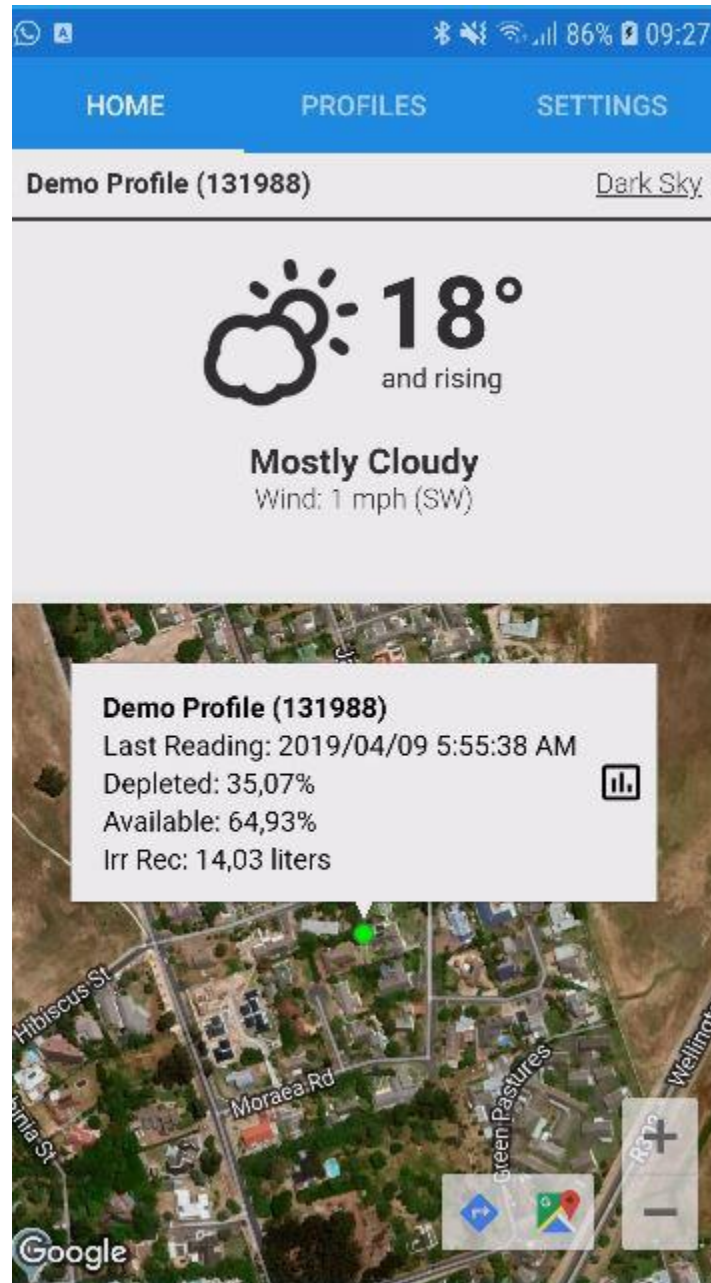

Using the APP

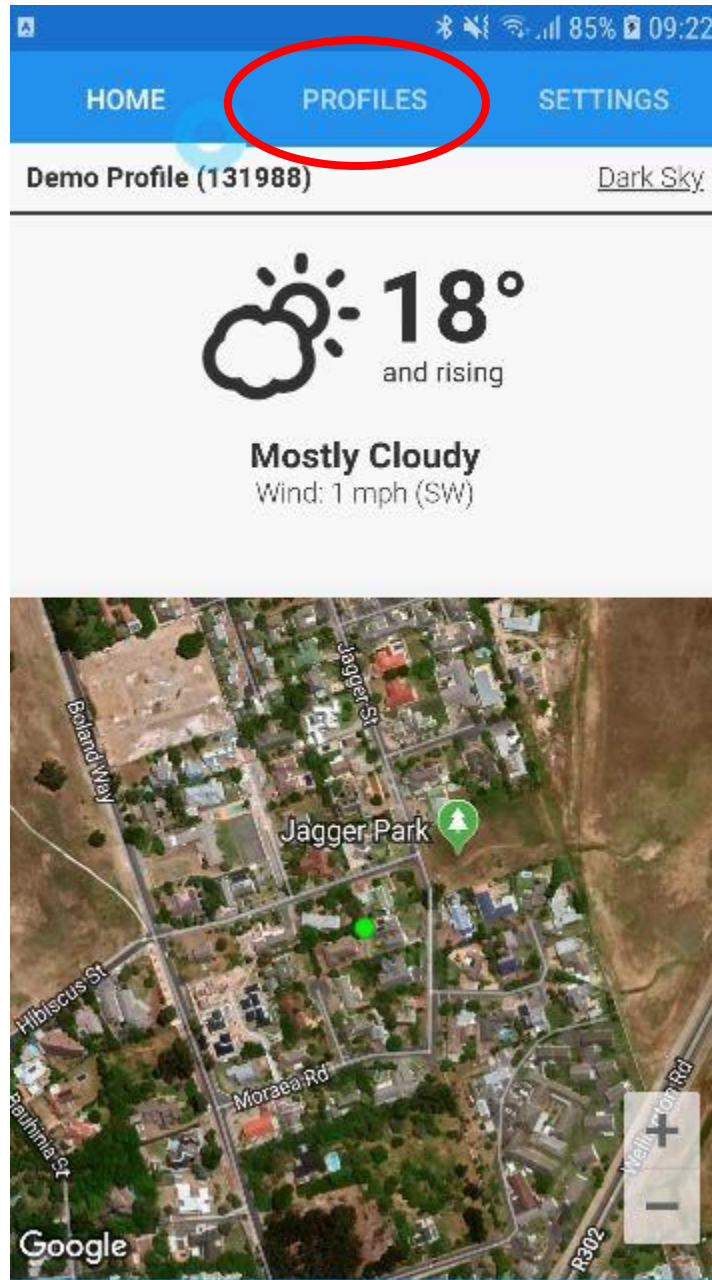

- a. Login: After opening the APP, the login screen will appear – only the 1st time. Use your current ACWeb login credentials.

- b. Navigating: After the login process is completed the Home Page will be displayed. By clicking on the green dot a pop up will be displayed on which you can click to open the graphs.

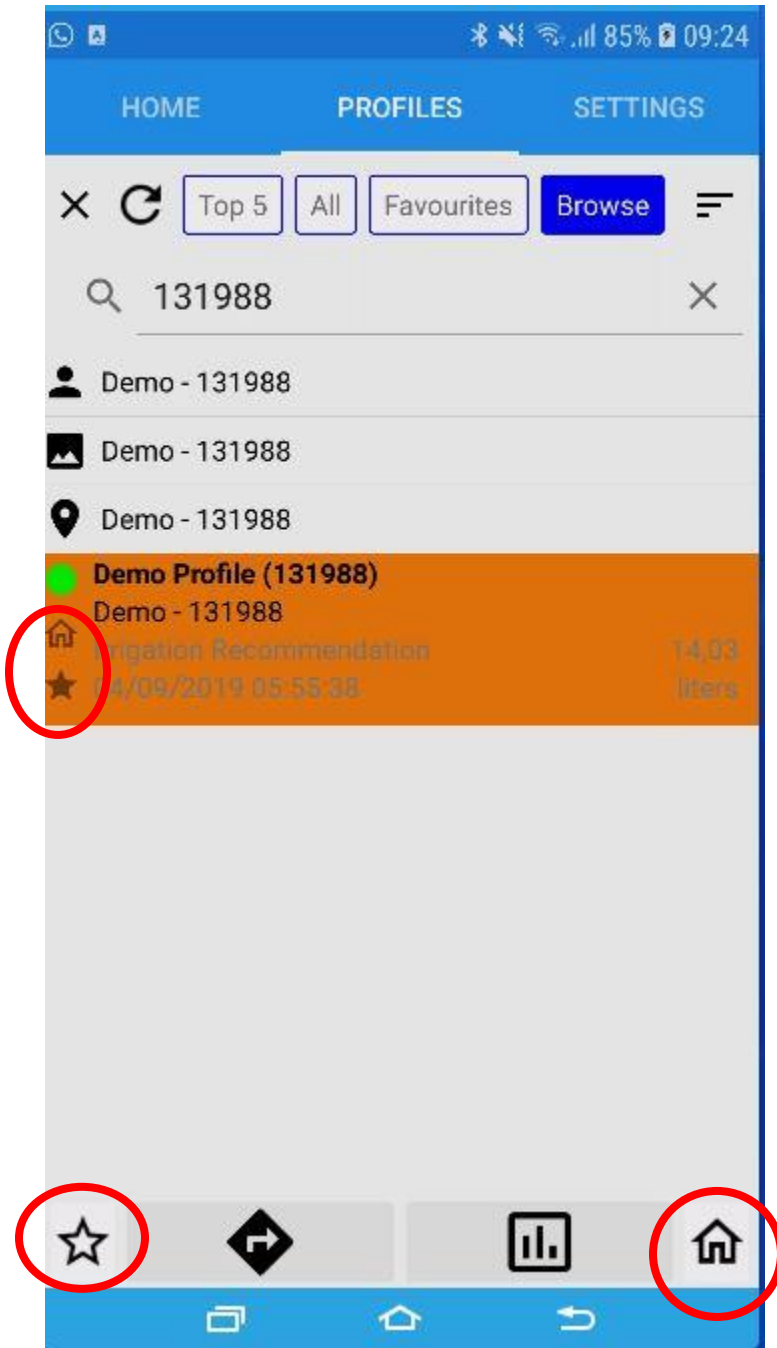

By clicking on PROFILES the Profiles page will be displayed.

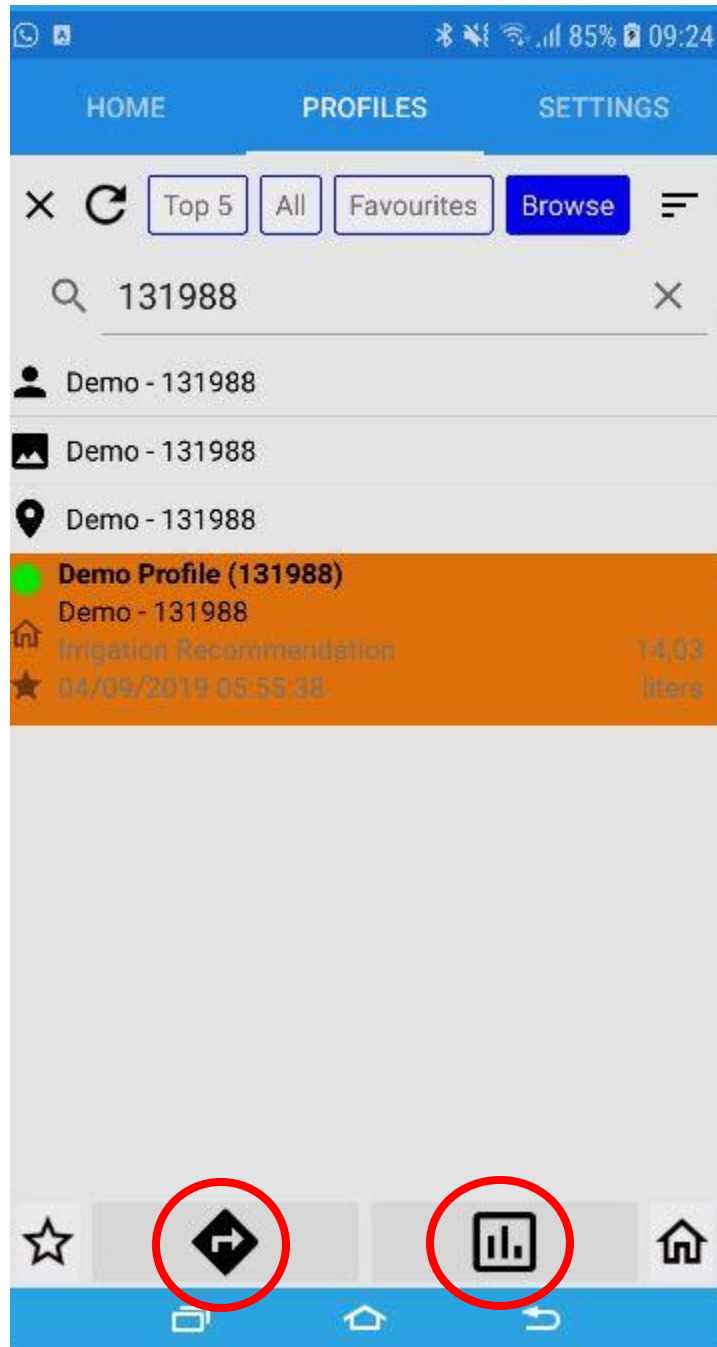

On the PROFILES page by selecting Browse you can browse through all your clients.

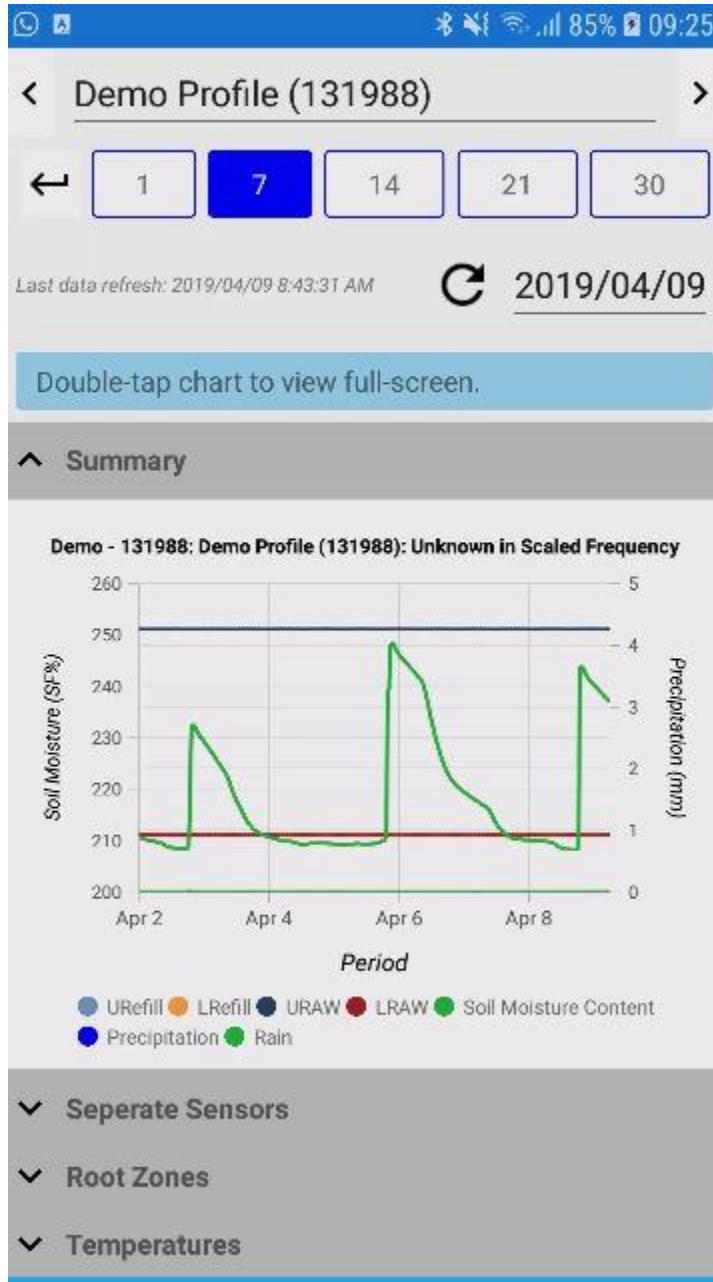

When selecting Browse you can also search for a specific profile number/name. When clicking on the result you can either add the profile as your default home/weather profile and add it as a favourite:

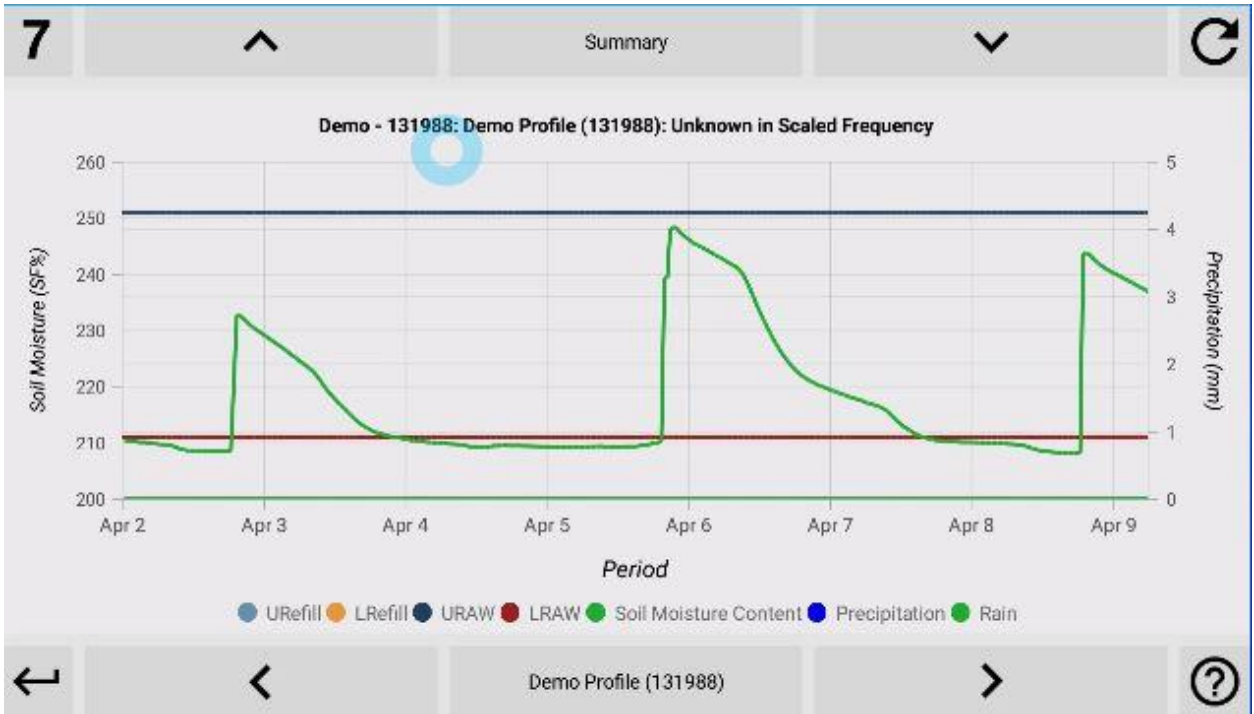

You can also navigate to the probe via Google Maps or view the graphs:

c. Graphs: When selecting the graphs, the following screen appears:

By double tapping on the graph the following screen appears.

Logout

By selecting the SETTINGS tab the user will be able to logout and login as a different user.
